GOOD AI VS. BAD AI: HOW CHATGPT IS CHANGING CYBERSECURITY

January 29, 2024
2:00 PM-3:15 PM

United Kingdom Time

The rapid rise of generative AI, prompted by the release of ChatGPT in late 2022, has security leaders concerned. By using this new technology, threat actors can now create highly effective attacks at scale, and few things are more vulnerable than your inboxes. Join this session to discuss:
- How cybercriminals are using generative AI to create their attacks
- Which types of attacks are likely to grow in volume and sophistication
- Why you need tools that utilize "good" AI to protect your organizations against this "bad" AI

CHAIR

Leo Cunningham
CISO
