GENERATIVE AI AND THE PUBLIC SECTOR

February 08, 2024
5:30 PM-9:00 PM

Eastern Time

The integration of artificial intelligence (AI) and cloud technologies is becoming increasingly relevant across various sectors of government. As a result, a diverse range of government workers can benefit from knowledge of cloud and AI. CISOs play a crucial role in mitigating AI-related security concerns by integrating AI security considerations into their overall cybersecurity strategy, collaborating with AI development teams, and staying informed about emerging threats and best practices in AI and cloud security. Join us for a thought-provoking discussion on the implications of AI, its role in the evolving cyber security landscape, and the challenges and opportunities it presents.
