The Legacy Tax: Your Infrastructure is Killing Margins, Slowing Execution, and Exposing Risk

Financial services firms live and die by execution speed, cost efficiency, and risk control—yet outdated technology silently erodes P&L every single day. On-prem / even legacy cloud estates are a deadweight tax on your business. They force firms into spiraling costs, operational bottlenecks, and compliance risks. Even firms with some cloud adoption are struggling with outdated, inefficient hybrid environments that fail to deliver the agility, speed, and financial control they need.
