From Compliance to Confidence: Building Continuous Assurance at Scale

Traditional GRC processes can no longer keep pace with the speed of modern business. Lengthy security reviews and manual evidence collection slow innovation, strain teams, and create uncertainty for customers and boards alike. With AI transforming every layer of the enterprise, leaders have an opportunity to reimagine assurance as a real-time, intelligence-driven capability that supports responsible, rapid growth.

This executive event will bring together leaders to discuss the strategies and operating models shaping the future of trust. We'll explore how organizations are adopting AI-enabled assurance, enhancing visibility across their environments, and strengthening customer confidence while reducing operational drag. Participants will walk away with actionable insights to modernize GRC functions, improve trust velocity, and position assurance as a strategic business enabler.
