VIP tour of the Dallas Cowboys training facilities and Draft War Room

4:45 PM-5:45 PM

Dinner & Discussion

5:45 PM-9:00 PM

Modern applications are in a state of change.

In a recent survey, 49% of developers said over half of their organization's development effort is spent working on APIs. Application developers now expect secure APIs that allow automation and integration. Organizations need to ensure API endpoints aren't open to exploitation.

Checkmate by Checkmark brings together industry thought leaders and experts for an exclusive in-person discussion to share ideas and

strategies on the issues surrounding API security.
