## The Greatest Fears?

In the past year, software-driven organizations have faced some of the biggest challenges in order to keep pace with the digital transformation they are experiencing. As a result, moving to new software development methodologies like DevOps to speed time to market - while doing it securely - is now top of mind. The need to better serve clients digitally is imperative and software developers and AppSec teams are expected to deliver increasingly secure applications to do so. Therefore, CISO's of software-driven organizations are being tasked with taking immediate actions to improve application security without slowing development and time to release.

## PANELISTS

Speaker

Peter Chestna  
CISO, North America  
Checkmarx Inc.

Speaker

Cole Sinkford  
CISO  
GE Energy

Speaker

Erik Hart  
CISO  
Cushman & Wakefield

Speaker
