Why the World Needs Next-Gen SD-WAN and SASE

Technology and security leaders have been challenged by the pandemic-driven acceleration in the digital workforce and workplace

www.cvvisionintl.com

transformation. The need for anywhere, anytime access is transforming network access requirements as enterprises look for ways to scale secure access in a cost-effective way while preparing for the longer term.

Leveraging the cloud-first, cloud-native secure access service edge (SASE) approach, starting with zero trust network access (ZTNA), offers security and technology leaders the opportunity to strategically realign their secure network service architecture, optimize capital and operational expenses, and lay the foundation for an adaptive and resilient digital enterprise. Join an elite group of leaders to learn more about SASE's place in today's cloud era.
