## Strategic Cyber Resilience and Readiness

In the dynamic realm of cybersecurity, CISOs bear the crucial responsibility of not only proactively building cyber resilience but also orchestrating swift responses to defeat attacks within organizational networks.

This session delves into the essential traits necessary to achieve cyber resilience and readiness. It elucidates why being cyber ready transcends a mere static preparedness; rather, it's a continuum of vigilance in which organisations assess their standing, prepare comprehensively, simulate attacks to refine security measures, promptly detect and neutralize threats, and respond and recover swiftly to minimize business impact.

This holistic approach serves as the cornerstone for maintaining organisational continuity and enhancing the overall security posture amidst the ever-evolving cybersecurity landscape.

## PANELISTS

Speaker

**David Gray**  
Director Cyber Security  
Services EMEA  
Sygnia
