Navigating the Intersection: Third-Party Risk Management in South Africa's Evolving Data Landscape

AI Landscape and Data Privacy Laws - Amidst South Africa's dynamic AI terrain and evolving data privacy regulations like POPIA, mastering

third-party risk management is paramount. This session discussion explores the intricate balance between AI innovation and data protection, offering insights into integrating advanced risk management tools. By exploring AI governance and the intricacies of POPIA compliance, organizations can fortify their data defenses and navigate the complexities of the modern digital landscape. With a nuanced understanding of these key topics, businesses can mitigate risks effectively while harnessing the transformative power of AI technology within the bounds of regulatory standards.
