The Greatest Fears?

The biggest fear for CISOs is often human error, typified by a distracted user that falls for a well-crafted social engineering email. Secure email gateways and Microsoft fail to catch business email compromises and security analysts struggle to keep up with the flood of user-reported suspicious emails. How can we truly create a culture of security while also making the best use of a cybersecurity leader's most precious resource – people?

PANELISTS

Chair

Igor Volovich
Vice President,
Strategy
Qmulus

Speaker

Matt Halsey
Senior Director Sales
Cyren
